DESCRIPTION OF THE TRANSNATIONAL COOPERATION PROJECT

Motivations

As lead partner, the Lag Cittadella del Sapere wants to create a partnership in order to share participation in Expo 2025 and create synergies between the Lag States that will be present with their pavilions in OSAKA from 13th April to 13th October 2025.

“Designing the society of the future for our lives” is the central theme of Expo 2025 Osaka, centred on the relationship between tradition, creativity and technological innovation, which is expressed through three sub-themes: Saving, Empowering and Connecting Lives.

Common general objective

The Ideal Lands is to be a space, present in all the Pavilions of the Lag States participating in the project, to create a new future, proposing an inclusive and social approach aimed at enhancing quality and craftsmanship in association with new technologies. It will be the narrative and in-depth body, the space for creating; it will host a set of modern workshops each dedicated to different themes: technology and energy; food and the environment; manufacturing and design; art and architecture.

The Secret Gardens of Europe:

The garden, a contemporary reworking of the classic element of the labyrinth, will be an opportunity to experience a new balance between man and plant, between natural and artificial, balancing the organic originality of life with the rational design of man.

The aim is to create small spaces in the pavilions that illustrate the Ideal Lands to the world.

Strategic opportunity

Participation in Expo Osaka represents a strategic opportunity to promote the culture, industry, tourism and excellence of the LAG territories. It is a unique opportunity to show the world our traditions, innovation and peculiarities, with the aim of attracting investment and creating new international partnerships, helping to improve the visibility and image of our areas at a global level.

From this cooperation other projects can be generated that respect the ecosystem of the territories, defend collective goods, enhance agrifood products, and improve the quality of life. Expo will therefore also be an opportunity to strengthen partnership processes, to put public, private and civil society actors around the same table, and to overcome the distances between urban and rural areas, agricultural areas and coastal areas, dynamic areas and areas lagging behind in the processes of change, in the hope that other valuable initiatives such as those so far implemented by LEADER.

Project budget Lag La Cittadella del Sapere

Euro: 150.000,00

Chrono-programme of expenditure:

<i>Project start date: 1st February 2025</i>
<i>Project end date: 31st January 2026</i>
<i>Duration of the project: 12 months</i>
